Lila

Boston, MA | lilacelenia@pm.me | github.com/lilacelenia

Mathematics graduate building programming, data and finance skills toward a quantitative role. Quick to learn and quick to adapt.

Experience

Crew Member, Trader Joe's, Brookline, MA — June 2022 – present

- Write product orders for the Fresh and Deli sections, estimating demand from sales patterns and shelf counts to keep perishables in stock while limiting waste.
- Train new crew members on store procedures and systems, breaking tasks into clear steps so they can work independently.
- Receive and process incoming shipments, operating a pallet jack to move freight safely and on schedule.
- Operate point-of-sale systems, handling transactions accurately during high-volume periods.
- Answer customer questions and resolve issues on the floor, following the company's core values.

Student Reactor Operator Trainee, MIT Nuclear Reactor Laboratory, Cambridge, MA — July 2019 – January 2020

- Trained to operate a research nuclear reactor, including startups, shutdowns and routine operation under the supervision of licensed operators.
- Performed daily system checks to keep the reactor maintained and running safely.
- Learned the reactor's systems, safety interlocks and operating procedures from technical documentation, along with the fundamentals of reactor physics.

Education

B.A. Mathematics, Boston University — Graduated January 2023

Relevant coursework: Stochastic Methods, Complex Analysis, Statistics

Skills

Mathematics: Calculus (strong), Linear algebra (strong), Probability (strong), Statistics (solid), Complex analysis (working), Stochastic methods (working)

Programming: Python (solid)

Data: NumPy (learning), SQL (learning)
